

GREENHOUSE ASSISTANT

Arcadia Biosciences is hiring full-time Greenhouse Assistants for our Woodland research greenhouse facility that houses diverse crop plants. We are offering a range of scientific research greenhouse employment opportunities that support developing technologies that create value in the agricultural community, while benefiting the environment and enhancing human health. Duties may include routine assigned functions such as plant care and health, pollination, fertilization, and may extend higher responsibility tasks such as supervising others to complete work, data collection and data entry as needed for specific research projects.

Candidates should have a college degree in horticulture or related field or high school degree with 1-3 years experience. Candidates should have a basic understanding of plant growth, the ability to perform assigned tasks accurately and the capacity to function as a team member. Good computer skills are desirable. Hold current Qualified Applicators Certificate (pesticide certificate), or ability to obtain QAC within 9 months. Candidates must be able to work long hours in high heat and/or high humidity conditions, lift bulky materials, and able to work independently and communicate issues and details. This position does require participation in the weekend and holiday watering rotations.

Arcadia Biosciences offers employees an exciting and challenging scientific environment plus an attractive package of salary and benefits, including a 401(k) plan.
